Bank CIF & TPIN Management API 1.0.0

OAS 3.1

/api-docs

REST API for managing Bank Customer Information File (CIF) and Transaction PIN (TPIN).

Features:

- **Register**: Create a new CIF account
- **Set TPIN**: Set a TPIN for a newly registered CIF
- **Authenticate**: Authenticate using CIF + TPIN → returns JWT token
- **Reset TPIN**: Unblock CIF and set a new TPIN

Authentication Flow:

1. Call `/authenticate` with CIF + TPIN
2. Copy the `token` from the response
3. Click **Authorize** above and paste: `Bearer <token>`

CIF Status Flow:

`PENDING_TPIN` → (Set TPIN) → `ACTIVE` → (3 failed auth) → `BLOCKED` → (Reset TPIN) → `ACTIVE`
